Original OJEU contract ref:	2011/s 151-251029
OJEU Award Notice ref:	2012/S 67-108816

Section One - Scope and Context

In accordance with best procurement practice, EU & UK Procurement Directives & Regulations Kent County Council, Commercial Services (the Contracting Authority), on behalf of PRO5 Group has created an accessible Framework Agreement (the Agreement) for the supply and delivery of **Software Products and Associated Services**.

The Framework period is 36 months – 1st April 2012 to 31st March 2015 with the option to extend for 12 months to 31st March 2016.

PRO5 comprises of four of the largest public sector professional buying organisations in the UK with a combined purchasing power in excess of £2 billion per annum. The PRO5 organisations are representative of in excess of 200 local authorities and funded organisations. Working together the PRO5 group use their extensive buying power to help local authorities in England and Wales:

- get the best value solutions in key markets on commonly purchased goods and services
- deliver savings which contribute to local efficiency targets
- save time, effort and costs by accessing pre-negotiated compliant procurement arrangements

The Pro5 Group consists of the following:

- Central Buying Consortium (CBC)
- Eastern Shires Purchasing Organisation (ESPO)
- North Eastern Purchasing Organisation (NEPO)
- Yorkshire Purchasing Organisation (YPO)

The framework is accessible to all members, affiliates and associates of the PRO5 Group, Regional Improvement and Efficiency Partnerships (RIEP), the Police Service, the Fire Service, the NHS & NHS Trusts, third sector organisations, academic centres, publicly funded organisations and publicly owned private companies, operating within the geographic boundaries of the United Kingdom and Northern Ireland. Access to this Agreement shall be subject to the agreement of the Pro5 Group Member.

For information, a complete list of the current PRO5 membership and links to those bodies who are permitted access to the Agreement can be found at: www.espo.org/ojeu-framework-permissible-users

If you are unsure about your eligibility to access the contract please contact the lead authority, Kent County Council (Contact details on page 2), who can advise you.

Section 2 – Using the Framework

Benefits of using the Framework

- Clients can re-open competition within the framework, removing the need for clients to conduct a full tender exercise or lengthy supplier evaluation each time they have a Software or Associated Service requirement, saving time and costs associated with procurement exercises
- This framework is fully compliant with the Public Contracts Regulations 2006
- Terms & Conditions are established to underpin the Framework (see section 5)
- The Framework will be managed and monitored by Commercial Services(acting for Kent County Council) on behalf of our clients and your views and requirements will be taken into account when reviewing and developing the contract
- The Framework has been established with tendered 'uplift' percentage on cost price (Supplier's basic cost plus percentage mark-up) for each organisation.

The framework has been divided and awarded as 4 (four) individual lots:

LOT 1 – Microsoft

Relates to products licensed and distributed by Microsoft or Microsoft approved resellers including, but not linked to, Select Agreements, Subscription Agreements and Enterprise License Agreements.

LOT 2 – Security

Relates to the supply of Security software, services and where appropriate, associated appliances which includes Corporate Firewall, Anti-Virus Protection, Data Encryption, Vulnerability Scanning, Email Spam Filtering, Log Consolidation, Network Packet Analysis, Intrusion Detection, Active Directory Reporting, Alert Automation, Patch Management and Database Security Evaluation Tools.

LOT 3 – Commercial off the Shelf (COTS)

Commercial Off the Shelf (COTS) is software of a standard product, not developed by a Supplier for a particular application. Types of Software include, GIS, Graphics, Web Design, Desktop Publishing & Photo Editing Tools, Reporting Tools, Terminal Services, Virtualisation Software (server & desktop) Software Tools for Flexible Working, Alternative Operating Systems, Alternative Desktop Productivity Suites and CAD Software.

LOT 4 - Educational Software

Educational software is intended to support the educational curriculum that will be used in Early Years, Primary, Secondary, Higher Education, Further Education & SEN environments.

To meet the needs of our Education customers it is a requirement that all tenderers are able to provide a fully functional online catalogue showing the full product range

Awarded Suppliers:

The following table sets out the suppliers in each lot appointed to the framework.

Suppliers	Lot 1 - Microsoft	Lot 2 - Security	Lot 3 - COTS	Lot 4 – Education
2 Simple Software	X	X	X	✓
Academia Ltd	X	✓	X	✓
Bytes Software Services	✓	✓	✓	X
Caretower Ltd	X	✓	X	X
Civica Ltd	✓	X	X	X
Insight Direct Ltd	✓	✓	✓	X
Phoenix Software Ltd	✓	✓	✓	✓
SCC	X	X	✓	X
Softcat	✓	✓	✓	X
Software Box	✓	✓	✓	✓
Viglen	X	X	X	✓
Whizz Education	X	X	X	✓

Using the Framework

Users can use the Framework in two ways, either to call off from the Framework on the basis of tendered cost methodology or to re-open competition by way of a mini competition

Calling off from the Contract

The Framework has been established with tendered ‘uplift’ percentage on cost price (Supplier’s basic cost plus percentage mark-up) for each organisation. These prices will be applicable to any work commissioned under the Framework, and in calling off from the Framework, users simply need to contact the supplier they identify as providing best value for money for the products or services they require. Users will need to advise the supplier (ideally by way of a project brief) of the products/services they require, and the timescale within which they want the products/services delivered.

Users should be aware that the base cost price the supplier uplifts from can vary and therefore the lowest Uplift figure may not necessarily equate to best value

Conducting Mini-Competitions

In order to adhere to The Public Contracts Regulations 2006 users are requested to follow the steps outlined below when wishing to place orders under this Agreement

1. The user must invite all suppliers who are a party to the Framework and who are capable of delivering the customer’s particular requirement within the relevant lot. For example, if the user wished to procure a Microsoft licence, they would need to invite all awarded suppliers within Lot1 of the Framework to participate.
2. Users must ensure they quote ref: **Pro5 Agreement Y10178** on all requests
3. The user shall formulate a project brief containing full details of the requirement. This should include as a minimum a set of outcomes the supplier is expected to deliver, and the timescale within which they are required to deliver the products/services.

4. The user shall send the brief to all suppliers within the Lot (either in writing or via email) inviting them to submit a tender, setting a time limit for the submission of written responses. Tender submissions must be submitted to a named and secure point and shall remain unopened until the closing date and time stated in the supplier brief has elapsed.
5. If the user can determine a commonly purchased basket of goods within a specific Lot it is possible to perform a mini competition that would cover a defined period of time ie quarterly/6 monthly or call-off quantity negating the requirement to mini competition on a more frequent basis. This must be communicated to all the tenderers at the beginning of the process.
6. The written responses should be kept confidential until the tender return deadline has passed.
7. The tender submitted shall be evaluated using all or part of the evaluation criteria set out during the initial tender process (listed below). The client may choose which of the head criteria they wish to use and may include there own sub criteria to provide more specific detail and set the weightings to reflect the needs of the mini-competition. The assessment criteria, along with details of the methodology the client is proposing to adopt during evaluation, **must** be communicated to all tenderers invited to compete at the initial brief stage and must not substantially change the specification laid out in the original tender. The requirement will be awarded on the basis of Most Economically Advantageous Tender

Assessment Criteria
Value for Money
Quality of Goods/Service
Pricing

Monitoring the Framework

As this is a Framework, Commercial Services (on behalf of Kent County Council) will not be involved in the day to day management of the suppliers and the products or services they provide. Commercial Services (on behalf of KCC) will however be closely monitoring the progress and performance of the Framework throughout it's duration. In order to do this effectively it is a requirement of Commercial Services (on behalf of KCC) that users return a copy of the Monitoring form in Section 4 for **each** order placed as a result of a mini tendering exercise.
